

VOICE SOLUTIONS

Let Our Kloud take your business to new heights in communications!

Our Kloud's Voice Solutions include scalable alternatives for companies of any size, for every business scenario. Whether you prefer managed voice services in the cloud, traditional private phone systems, or a hybrid phone system to meet your business needs, Our Kloud has the solutions that make a difference.

- Cloud Voice Systems
- Traditional PABX Systems
- PSTN, ISDN, and SIP Trunks
- Conference Solutions
- Inbound Numbers
- Managed Cloud
- Private PABX
- Analogue Systems
- VoIP / SIP
- Hybrid Solutions
- Quality Conferencing
- Custom Numbers

When you desire a cost-effective, fully managed voice system, cloud is the solution for your small company or large enterprise. Your communications platform is one of the most important aspects of your business success, and Our Kloud offers three state-of-the-art cloud voice solutions for companies that are concentrated in one location, spread across multiple sites, or relying on talent from separate remote locations across the globe.

HENDROS SOLUTION

Hosted VoIP, PABX, and video conferencing in one all-inclusive package, complete with the equipment, special features, and custom options to align with your business needs.

HENDRISK SOLUTION

A custom, open source telecom solution for companies that require phone services for up to 100 users, in a cost-effective packaged deal you won't want to miss.

ACCESSORIES

Voice accessories you need for seamless communications and phone system integration: phones, headsets, mobile adaptors, hardware, software, and USB modems.

TRADITIONAL PABX SYSTEMS

For companies who seek a traditional Private Automatic Branch Exchange (PABX) system for business, Our Kloud offers this solution for private enterprises. This system is suited for organisations that require call centre functionality, a single number that connects multiple internal lines, and multiple line options for staff. Our Kloud establishes your PABX system and you manage it at the level you desire.

- Small Business Systems
- Service and Spare Parts
- Call Centre Solutions
- Accessories

We offer compatible solutions for phone system integration or any company workplace configuration.

PSTN, ISDN, AND SIP TRUNKS

If you are seeking a traditional analogue phone system, an integrated solution for direct voice and switched data, voice over Internet through SIP, or any combination of these, Our Kloud can design a voice strategy to align with your goals. We offer a desirable solution based on the size and scale of your company as well as your customer base that will meet your needs today and into the future.

- Public Switched Telephone Network (PSTN)
- Integrated Services Digital Network (ISDN)
- Session Initiation Protocol (SIP) and Voice Over Internet Protocol (VoIP)

Our Kloud takes a unique approach in blending the best features from trusted carriers in the industry to offer your business a tailored package deal.

CONFERENCE SOLUTIONS

Our Kloud provides a range of conference solutions that accommodate any business collaboration situation. If you need virtual meeting rooms or high-performance conference bridge tools, Our Kloud delivers innovative solutions and support for your conferencing needs. Our Kloud has the expertise to consult with you for a conferencing strategy and implementation plan to align with your business.

INBOUND NUMBERS

With Our Kloud voice solutions, companies enjoy endless options in phone number selections to meet business needs. With a range in the number of digits to the type of service plan you require, you select a package that serves you and your customers for success.

- Inbound Numbers
- 1800 Numbers
- 13/1300 Numbers
